QUEEN'S UNIVERSITY.

QUEEN'S UNIVERSITY

FACULTY OF MEDICINE

ANNUAL CALENDAR

Fiftieth Session, 1903-1904

KINGSTON :
THE JACKSON PRESS
1903

ACADEMIC YEAR.

1903.

- Sept. 2.—Notice of intention to appear at Supplementary and Medical Matriculation Examinations to be given in writing to Dr. Herald, Secretary of the Faculty. The subjects upon which the candidate intends to write must be stated in his notice, and the fee enclosed.
- Sept. 24—Supplementary Medical and Medical Matriculation Examinations begin. (Held in University.)
- Sept. 30—Classes begin.
- Oct. 7.—Holiday,—athletic games.
- Oct. 16.—University Day.
- Dec. 18.—Christmas Examinations begin.
- Dec. 19.—Christmas Holidays begin.

1904.

- Jan. 5.—Classes re-open.
- Feb. 17.—Holiday.
- Mar. 18.—Class-Work closes for those presenting themselves for M.D., C.M., only.
- Mar. 20.—Time expires for receiving essays for University prizes.
- Mar. 20.—Examinations begin.
- April 8.—Convocation for distributing prizes, announcing honours and laureating graduates.
- April 9.—Class-Work resumed.
- May 14.—Classes close for those taking the eight months' course.

TIME TABLE—FIRST SESSION.

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.	SATURDAY.
9—10	Biology and Physiology.	Anatomy.	Biology and Physiology.	Anatomy.	Biology and Physiology.	
.....
10—11	Practical Physiology & Histology.	Practical Anatomy.	Practical Physiology & Histology.	Practical Anatomy.	Practical Physiology & Histology.	
.....
11—12	Junior Chemistry.	Junior Chemistry.	Practical Junior Chemistry.	Practical Anatomy.	Practical Anatomy.	
.....
2—5	Practical Anatomy.	Practical Anatomy.	Practical Anatomy.	Practical Anatomy.	Practical Anatomy.	
.....
4—5		Materia Medica.		Materia Medica.		

TIME TABLE—SECOND SESSION.

—5—

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.	SATURDAY.
8-9	Analytical Chemistry.		Analytical Chemistry.		Analytical Chemistry.	
.....
9-10	Anatomy.	Physiology.	Anatomy.	Physiology.	Anatomy.	
.....
10-11	Physiology.	Histology and Experimental Physiology.	Physiology.	Histology and Experimental Physiology.	Physiology.	
.....
11-12		Experimental Physiology.	Experimental Physiology.	Senior Chemistry.	Senior Chemistry.	
.....
1-2		Demonstrations in Histology & Embryology.		Demonstrations in Histology & Embryology.		
.....
2-5	Practical Anatomy.	Practical Anatomy.	Practical Anatomy.	Practical Anatomy.	Practical Anatomy.	Practical Pharmacy.
.....
4-5	Materia Medica and Therapeutics.		Materia Medica and Therapeutics.		Materia Medica and Therapeutics.	

TIME TABLE—THIRD SESSION.

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.	SATURDAY.
9—10	Pathology.	Medical and Surgical Anatomy.	Pathology.	Medical and Surgical Anatomy.	Practical Pathology.	
.....
10—11	Clinical Medicine.	Clinical Medicine.	Clinical Medicine.	Clinical Medicine.	Practical Pathology, Clinical Medicine.	
.....
11—12	Clinical Surgery.	Clinical Surgery.	Clinical Surgery.	Clinical Surgery.	Clinical Surgery, Practical Pathology.	
.....
2—3	Medical Jurisprudence.	Practice of Medicine.	Medical Jurisprudence.	Practice of Medicine.	*Sanitary Science.	
.....
3—4	Surgery *Sanitary Science.	Surgery.	Surgery.	Surgery, *Sanitary Science.	Surgery.	
.....
4—5	Obstetrics and Gynæcology.	Obstetrics and Pædiatrics.	Obstetrics and Gynæcology.	Obstetrics and Gynæcology.	Obstetrics and Pædiatrics.	

*This class begins after Christmas holidays.

TIME TABLE—FOURTH SESSION.

TIME.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.	SATURDAY.
9—10	Medical and Surgical Anatomy.	Eye, Ear, Nose and Throat.	Medical and Surgical Anatomy.	Pathology.	Medical and Surgical Anatomy.	Eye, Ear, Nose and Throat.
10—11	Clinical Medicine.	Clinical Medicine.	Clinical Medicine.	Clinical Medicine.	Clinical Medicine.	*Bacteriology.
11—12	Clinical Surgery.	Clinical Surgery and Gynæcology.	Clinical Surgery.	Clinical Surgery.	Clinical Surgery and Gynæcology.	*Bacteriology.
1—2		Pathology.				
2—3	Practice of Medicine.	*Bacteriology.	Practice of Medicine.	*Bacteriology.	Practice of Medicine.	
3—4	Surgery.	Surgery. *Bacteriology.	Surgery.	Surgery. *Bacteriology.	Surgery.	Mental Diseases.
4—5	Obstetrics and Gynæcology.	Obstetrics and Præiatrics, *Bacteriology.	Obstetrics and Gynæcology.	Obstetrics and Gynæcology, *Bacteriology.	Obstetrics and Præiatrics.	

*This class closes at Christmas.

OFFICERS OF INSTRUCTION.

FACULTY OF MEDICINE.

FIFTIETH SESSION, 1903-1904.

Medicine.

- FIFE FOWLER, M.D., L.R.C.S., EDIN., Emeritus Professor of the Principles and Practice of Medicine. Dean of the Faculty.
JOHN HERALD, M.A., M.D., Professor of Clinical Medicine and Dermatology. Secretary of the Faculty.
J. W. CAMPBELL, M.D., C.M., Professor of Materia Medica, Therapeutics and Pharmacy.
JAMES THIRD, M.D., Toronto; M.D., C.M., Trinity. Professor of Practice of Medicine.

Surgery.

- HON. MICHAEL SULLIVAN, M.D., Professor of the Principles and Practice of D. E. MUNDELL, B.A., M.D., Assistant. [Surgery.
W. G. ANGLIN, M.D., M.R.C.S., ENG. Professor of Clinical Surgery.

Obstetrics, Gynaecology and Paediatrics.

- R. W. GARRETT, M.A., M.D., Professor.
ISAAC WOOD, M.A. M.D., M.R.C.S., ENG., F.O.S., EDIN., Assistant Professor and Lecturer on Paediatrics.

Medical Jurisprudence.

- W. T. CONNELL, M.D., M.R.C.S., ENG., L.R.C.P., LOND., Professor

Sanitary Science.

- PROF. W. T. CONNELL

Anatomy.

- EDWARD RYAN, B.A., M.D., Professor of Anatomy.
D. E. MUNDELL, B.A., M.D., Professor of Surgical Anatomy
G. W. MYLKS, M.D., C.M., Demonstrator
A. E. ROSS, B.A., M.D., C.M.,
C. A. MORRISON, M.D., C.M.,
A. W. RICHARDSON, B.A., M.D., C.M., } Assistant Demonstrators

Pathology and Bacteriology.

- W. T. CONNELL, M.D., M.R.C.S., ENG., L.R.C.P., LOND., Professor
A. R. B. WILLIAMSON, M.A., M.D., M.R.C.S., ENG., L.R.C.P., LOND., Demonstrator

Diseases of the Eye, Ear, Throat and Nose.

- J. C. CONNELL, M.A., M.D., Professor

Mental Diseases.

- C. K. CLARKE, M.D., Medical Supt. of Rockwood Hospital for Insane, Professor

Biology, Physiology and Histology.

- JAMES FOWLER, L.L.D., F.R.S.C., Professor of Botany and Vegetable Histology
A. P. KNIGHT, M.A., M.D., Professor of Animal Biology, Physiology & Histology
C. M. STRATTON, B.A., M.D., C.M.,
J. V. CONNELL, M.D., C.M., } Demonstrators and Tutors.

Chemistry and Applied Chemistry.

- W. L. GOODWIN, D. SC., EDIN., Professor
ISAAC WOOD, M.A., M.D., M.R.C.S., ENG., F.O.S., EDIN., Lecturer
JOHN WADDELL, Ph. D., LEIP., D. SC., EDIN., Lecturer

Physics.

- W. C. BAKER, M.A., Associate Professor.

Librarian.

- W. T. CONNELL, M.D.

MEDICAL BUILDING,

ANNOUNCEMENT.

The Fiftieth Session will commence Sept. 30th, 1903.

Certificates of attendance are recognized by the Royal Colleges of Physicians and Surgeons of London and of Edinburgh, so that those possessing the Degree of M.D. from Queen's University, are entitled to all the privileges in Great Britain that are accorded to the students and graduates of other colonial colleges and universities.

The General Medical Council of Great Britain and Ireland requires candidates for license to have spent five winter and four summer sessions in the study of medicine.

The medical department occupies very commodious premises immediately adjacent to the other University buildings and the hospitals. The building has been recently enlarged and improved, and contains lecture rooms and laboratories for the study of Pathology, Bacteriology and Pharmacy. The upper floor is devoted to the study of Anatomy and has a large dissecting room, two lecture rooms and a room for private demonstrations.

Instruction in the various departments of Chemistry is given in the John Carruthers Hall, and in Physics, Physiology and Histology in the University buildings immediately adjoining.

The Kingston General Hospital and the Hotel Dieu, both within a few minutes walk of the University buildings, are open to the students and offer every facility for the study of clinical cases. Students, if they so desire, can visit the Hospital for the Insane with DR. CLARKE, the Superintendent, in addition to visiting the other hospitals.

The General Hospital has now accommodation for two hundred patients, its capacity having been largely increased by the completion of the NICKLE wing. Another building (a bequest of the late MICHAEL DORAN), especially for obstetric and gynæcological cases, has been erected. A theatre for *post*

mortem examinations has also been built. An operating amphitheatre (the gift of the late DR. K. N. FENWICK), built on the most approved modern plans, affords students every facility for observing surgical operations.

Good board in respectable houses may be obtained at prices ranging from \$3.00 to \$4.00 per week. Lists of boarding and lodging houses can be obtained on application to the Registrar of the University.

CURRICULUM.

Candidates for the Degrees of M.D., C.M., must have completed a period of four years study, which must comprise three winter sessions of at least six months each, and one session of eight months, and have passed the matriculation examination of Queen's College, or an equivalent.

NOTE.—Students intending to take the License of the Ontario Medical Council must attend four winter sessions of eight months each.

NOTE.—A number of the Provinces of Canada and many of the States of the Union require an eight months session all students are recommended to attend four full sessions of eight months each.

SUBJECTS OF MATRICULATION.

English Language, Grammar and Composition, as required for second class teacher's certificate.

Arithmetic, with vulgar and decimal fractions.

Algebra, including simple equations.

Geometry, first two books of Euclid.

LATIN AUTHORS.

1903 { Cornelius Nepos, Lives of Themistocles, Aristides and Hannibal ; Cæsar, Bellum Gallicum, Bk. IV. (omitting Chap. 17), and Bk. V., Chaps. 1-23 ; Æneid, Bk. II. (1-505).

A paper on Latin Grammar.

Physics, as in Stewart's Physics (or High School Physics), or one book in Greek, French or German.

NOTE.—Students who have not taken Physics at Matriculation must attend the Junior Physics in Arts or Physics I. in Science.

Graduates and matriculants in Arts from any recognized University, and all who have passed the Matriculation examination prescribed by the Medical Council of Ontario, are not required to pass the above Matriculation examination.

At any centre at which at least two students apply for Matriculation examination, an examination will be held on July 16th.

Intending matriculants must notify the Registrar of the University not later than the 15th day of June, 1903. The usual fee (\$5.00) must be sent with the application.

The Matriculation examination must have been passed before a student will be credited with any of the professional examinations, although lectures may be attended before passing it. *Full first year +*

Graduates in Arts who have taken in their Arts course the subjects of Chemistry and Biology, including Physiology and Histology, may complete their Medical curriculum in three years.

Every candidate must have given regular attendance on full courses of instruction in the following departments for the periods stated.

SUBJECTS OF STUDY AND FEES.

1st Year : Physics, Animal Biology, Physiology, Histology, Anatomy, Chemistry—Practical Anatomy and Materia Medica.

NOTE.—Students who have taken Physics at Matriculation are not to take this class.

2nd Year:—Anatomy, Materia Medica, Therapeutics, Practical Pharmacy, Chemistry—Theoretical, Chemistry—Analytical and Practical, Anatomy, Physiology, Histology, Embryology.

3rd Year:—Practice of Medicine, Clinical Medicine, Surgery, Clinical Surgery, Obstetrics, Gynæcology and Pædiatrics, Jurisprudence, Pathology, Medical and Surgical Anatomy, Physiology, Sanitary Science.

NOTE.—Students are advised to make their third year an eight months' session.

4th Year:—Practice of Medicine, Clinical Medicine, Surgery, Clinical Surgery, Obstetrics and Gynæcology, Medical and Surgical Anatomy, Pathology and Bacteriology, Mental Diseases, Diseases of the Eye, Ear, Nose and Throat.

The Fee (including registration, examination, laboratories, library, gymnasium, and the required amount of dissecting material), is \$100 per session, but if paid in full before October 16th, the fee is \$95; if not paid in full before January 10th, \$105. Special arrangements will be made as to fees with those who do not take the full course of any year.

In addition to the above fees, each student will be required to pay \$5 per session for the exclusive use of a microscope.

The above course of study may have been pursued either wholly at Queen's, or partly at Queen's and partly at some other recognized medical school. In the latter case at least one full session must have been spent at this University.

To meet the requirements of the Medical Council of Ontario, and the General Medical Council of Great Britain, a fifth year course has been adopted as follows:—

5th Year:—Operative Surgery on the Cadaver, Sectional Anatomy, Clinical Medicine (including Physical Diagnosis), Ophthalmology, Mental Diseases, Clinical Surgery, Diseases of Women, Diseases of Children, Practical Pathology, and Bacteriology with special attention to the examination of urine, sputum, bile, stomach contents, etc.

The fee for this session is \$50.

Certificates of attendance on lectures are accepted from incorporated medical schools in the British Dominions and others recognized by British universities and licensing bodies. Other certificates of attendance on lectures and examinations may be accepted at the discretion of the faculty.

Students who have passed the Senior Leaving examination in Zoology of the Education Department, will not be required to attend lectures on Animal Biology during the medical course.

All students must present certificates of having compounded medicine for a period of six months in the office of a regularly qualified medical practitioner; of having attended at least six

cases of midwifery ; of having reported six medical and six surgical cases ; of having attended and reported on six post mortem examinations ; and of having attended hospital practice for at least twenty-four months.

Graduates in Arts who have attended during their course lectures, or taken practical instruction of the character or duration required by the curriculum in medicine, may obtain certified tickets of the course on payment of the ordinary fee demanded from students in Medicine, less the laboratory fee, paid during their Arts course.

Students in Arts or Science having the study of Medicine in view are recommended to take either of the following courses, as they thus may obtain their B.A. and M.D., or their B.Sc. and M.D. degrees in six years :

Course leading to B.A. and M.D. in six years.

- A.—1. Junior Latin.
2. Junior Greek.
3. Junior French.
4. Junior German. } Any two.

- B.—1. Junior and Senior English.
2. Junior Philosophy.
3. Junior Mathematics.

- C.—1. Junior Physics and Junior Chemistry.
2. Animal Biology and Medical Botany.
3. Junior and Senior Materia Medica.
4. Junior and Senior Anatomy.
5. Senior Physiology and Histology.
6. Senior Chemistry.

- D.—1. Preliminary Honour Chemistry.
2. Preliminary Honour Animal Biology.

Examination on Translation in French or German at the end of the second, third and fourth years.

Course leading to B.Sc. and M.D. in six years.

FIRST YEAR.—Fee \$55.00.

- Mathematics, I., including Descriptive Astronomy (8).
Junior English (3).
Physics, I. (5).
Junior Chemistry (3).
Botany (3).
Drawing (5).

SECOND YEAR.—Fee \$55.00.

Senior Chemistry (2).
Qualitative Analysis, including Urinalysis (10).
Animal Biology (3).
Elementary Geology (3).
Botany of Algæ and Moulds (1).
Bacteriology (3).

THIRD YEAR.—Fee \$60.00.

Comparative Anatomy }
Physiology and Histology. } (12).
Quantitative Analysis (water, air, food) (5).
Surveying, I. (3).
General Engineering, I. (2).

FOURTH YEAR.—Fee \$65.00.

Human and Comparative Anatomy (10).
Physiology and Histology (7).
Pathology (3).
Sanitary Science (2).
Heredity, Imbecility, Insanity, Criminology } (2).

EXAMINATIONS AND GRADUATION.

Every candidate intending to appear at the Final examination must, on or before the 13th day of March (in the year in which he proposes to graduate), present to the Secretary a declaration under his own hand that he is twenty-one years of age, or that he will be so before the date of graduation, accompanied by a certificate of good moral character, and a statement of his medical studies, with proper certificates.

Every student must on or before March 13th notify the Secretary of the examinations upon which he intends to write. For this purpose blank forms are supplied.

EXAMINATIONS.

Examinations are required at the end of every session as follows:—

At the end of the first session :

Anatomy, Animal Biology and Physiology, Theoretical Chemistry, Materia Medica.

At the end of the second session :

Anatomy, Physiology, Histology, Materia Medica, Therapeutics and Practical Pharmacy, Chemistry--Theoretical and Analytical.*

At the end of the third session :

Practice of Medicine, Surgery, Obstetrics and Gynæcology, Pathology, Jurisprudence, Medical and Surgical Anatomy, Sanitary Science.

At the end of the fourth session :

Practice of Medicine, Clinical Medicine, Surgery, Clinical Surgery, Obstetrics and Gynæcology, Medical and Surgical Anatomy, Pathology, Bacteriology,* Diseases of the Eye, Ear, Nose and Throat, and Mental Diseases, (Optional.)

*Examinations on these subjects will be held on Dec. 18th.

On each senior paper the examiner may put pass and honour questions. Students desiring rank must answer both.

A candidate cannot obtain University rank for any of the foregoing examinations until he has matriculated.

Supplementary examinations will be held in Convocation Hall, commencing September 24th, at 10 a.m.

Students who desire to take an honour course in Arts and who have the study of Medicine in view, are advised to take, during their Arts course, the Honour subjects in Animal Biology, and thus complete part of the Practical Anatomy and all the Physiology and Histology of their Medical course. An Arts Degree along these lines shortens by one year the course of study required by the Medical Council of Ontario.

EQUIVALENT EXAMINATIONS.

The following courses and examinations in Arts will be accepted in Medicine :—

1. Attendance on the preliminary honour course and examination in first year Animal Biology and preliminary honours.

2. Attendance on the honour course and examination in second year Animal Biology, including Histology.

3. Course and examination in Junior Chemistry.

4. Course and examination in Senior Chemistry No. 3, and 1st honour No. 2. Arts Calendar.

5. Course and examination in 1st year honors, Nos. 1, 2 and 3.

1. Course and examination in first year Physiology and Animal Biology.

2. Course and examination in second year Physiology and Histology.

3. Course and examination in first year Chemistry.

4. Course and examination in second year Chemistry.

5. Course and examination in Senior Chemistry and in Analytical Chemistry.

NOTE.—Equivalents 1 and 2 do not apply to Arts students who attended the honour classes prior to 1894.

FEES.

Degree of M. D.....	\$25 0
Degree of C. M.....	5 00
Sessional Fee for each of the first four years	100 00
Fifth Year	50 00
Supplemental Examinations (each year).....	10 00
Hospital Ticket,—full course	20 00
Hospital Ticket,—single session	7 00
<i>Ad eundem statum</i>	10 00

All class, registration and examination fees are payable to Dr. Herald, Secretary-treasurer of the Faculty of Medicine, and must be paid in advance.

Fees for the degrees of M.D. and C.M. are payable to G. Y. Chown, B.A., the Registrar of the University.

KINGSTON GENERAL HOSPITAL—FRONT VIEW.

PRIZES.

Besides University prizes, scholarships and honours open to Medical students, the following are offered, viz.:—

1. The Dr. Hayunga Prize for the best dissection of an upper extremity. This prize consists of some standard work on Surgery, and is open to all students in Medicine.

2. At the end of the second session :

A prize of \$25.00 to be awarded to the student making the highest number of marks on this year's examination in Anatomy, Physiology Histology and Chemistry, Theoretical and Practical.

3. At the end of the second session :

Some standard work on Medicine (value \$10), presented by Dr. Geo. Hayunga, of New York, will be awarded to the student making the highest percentage of marks on the year's examination in Materia Medica, Therapeutics and Pharmacy.

4. At the end of the third session :

The Dean Fowler Scholarship; value \$50.00.

This Scholarship will be awarded to the student making the highest per centage of marks on the examinations of the year, and will be enjoyed by the successful candidate during his fourth session.

5. The Dr. McCabe prize of a standard work on Pathology, for the best written and practical examination on Pathology.

6. At the end of the fourth session :

The Chancellor's Scholarship of \$70.00.

This Scholarship is open to students who take the examinations of the Ontario Medical Council, and is tenable only on condition that during the following year the winner pursues the studies of the fifth session at Queen's, as prescribed in the Calendar, or studies in Europe for a like period.

This Scholarship will be awarded to the student who has made the highest number of marks on all examinations of the four years' course.

7. A University Medal to the student making the highest number of marks in the examinations in Practice of Medicine, Clinical Medicine, Pathology, Bacteriology, Sanitary Science and Jurisprudence.

8. A University Medal to the student making the highest number of marks in Surgery, Clinical Surgery, Obstetrics and Gynæcology, Medical and Surgical Anatomy.

9-11. Three House Surgeoncies at the Kingston General Hospital, of twelve months each, are to be awarded to the three students making the highest per centages on the examinations of the fourth year. Candidates for these positions must have passed all previous examinations. These appointments must be approved by the Board of Governors of the Kingston General Hospital.

A House Surgeoncy and the Chancellor's Scholarship cannot be held by the same student, but a student winning both may elect which he will hold.

12. A prize of \$25.00, given by Dr. C. K. Clarke, to the fourth year student passing the best examination on the subject of Mental Diseases.

13. A prize of a standard work, given by Dr. D. E. Mundell, for the best examination in Medical and Surgical Anatomy.

STUDENTS' APPOINTMENTS.

Dressers in Eye and Ear Department.

Clinical clerks—Medical, Surgical and Gynæcological, to take charge of and report upon the cases in the wards of the hospitals.

Pathological clerks will be appointed in turn during the session to prepare microscopic specimens, and to assist at and report upon post mortem examinations.

Prosectors to the Chair of Anatomy to each of whom a Diploma of Merit will be awarded.

Prosectors to the Chair of Medical and Surgical Anatomy to each of whom a Diploma of Merit will be awarded.

Demonstrators and Assistant Demonstrators in Materia Medica and Pharmacy, and in Physiology and Histology, will be appointed. Fifth year students holding these appointments are exempt from the fifth year fee of \$50.00.

GENERAL ANNOUNCEMENTS.

The University examinations in medicine will begin on March 20th, 1904.

The examinations of the Ontario Medical Council will be held in Kingston, beginning on the third Tuesday in May, 1904.

All who desire to practice medicine in Ontario must pass the matriculation and other examinations of the Medical Council.

All announcements and regulations contained in this Calendar apply to the current session only.

All applications with reference to the course must be made to DR. HERALD, Secretary of the Faculty.

COURSE OF INSTRUCTION.

1.—THEORY AND PRACTICE OF MEDICINE.—(PROF. THIRD.)

The course consists of 100 lectures and embraces the general principles of Medicine; the nature and causation of disease, a careful consideration of the diseases of the body ordinarily met with, their symptoms, recognition, means of prevention, &c., &c. Much time is devoted to the subject of treatment, medicinal and hygienic.

These lectures are illustrated by plates, morbid specimens and models of diseased parts.

2.—CLINICAL MEDICINE.—(PROF. HERALD AND DR. RYAN.)

1. Clinical study of disease, with reports of cases.
2. The instruments employed in the diagnosis of disease.
3. Physical diagnosis of medical diseases.
4. The diagnostic import of the chemical and microscopical examination of the blood, expectoration, vomited matters, gastric contents, urine and serous effusions.

Patients in the wards of the General and Hotel Dieu Hospitals are used to illustrate these lectures.

3.—MATERIA MEDICA AND THERAPEUTICS.—(PROF. CAMPBELL.)

In this course, which consists of 100 lectures, all the important drugs used in medical, surgical and obstetrical practice will be fully described, and their properties, preparations and doses given. Their therapeutic action, and the conditions in which a particular medicine of a certain class is more suitable than others of the same class, will receive special attention.

This course will be illustrated by plates and specimens of the various drugs and chemicals used in medicine.

Instruction in prescription writing forms a prominent feature of the course.

4.—PRACTICAL PHARMACY.—(PROF. CAMPBELL.)

This course consists of twenty demonstrations on pharmaceutical preparations, the dispensing of prescriptions, examination of drugs, especially so as to distinguish those which in appearance closely resemble each other.

5.—PRINCIPLES AND PRACTICE OF SURGERY.—(PROF. SULLIVAN.)

These lectures treat of the principles and practice of Surgery and include a course of surgical Anatomy, and surgical Pathology, illustrated by plates, models and specimens, explaining the most recent theories. The use of instruments and surgical apparatus and appliances is taught. The chief operations are performed on a cadaver, and advantage is taken to give a concise and practical course in special surgery, introducing the latest and most improved operations and modes of treatment with the use of such instruments as are now employed in special surgery.

6.—CLINICAL SURGERY.—(PROF. ANGLIN AND DR. RYAN.)

These lectures are given upon the various surgical cases in the wards of the General and Hotel Dieu Hospitals. They are delivered at the bedside or in the theatre of the hospitals.

When the lectures are delivered in the theatre the patients are brought in and their diseases exhibited to the class; the symptoms, diagnosis, treatment, course and probable termination of them are thoroughly impressed upon the minds of the students. When requiring it, the lectures are elucidated by plates, surgical apparatus, morbid specimens, models, etc. All operations are performed in the presence of the class.

Special instruction will be given in the application of splints, bandages and antiseptic appliances.

7.—OBSTETRICS AND DISEASES OF WOMEN.—(PROFS. GARRETT
AND WOOD.)

This course consists of 100 lectures embracing the principles and practice of Obstetrics and a full course on Gynæcology, illustrated by drawings, models, the use of artificial pelvis, etc.

The class will be admitted in sections to see the operations in the Doran building.

Ample opportunities will be afforded to the students for studying this important branch, practically, as they will be arranged in classes to attend the obstetric practice of the hospital.

Full instructions will be given for the after-management of obstetric cases, and the accidents and diseases of that critical period will be discussed, and also the diseases of infancy and early childhood.

8.—MEDICAL JURISPRUDENCE.—(PROF. W. T. CONNELL.)

This course includes documentary and oral evidence, identification, real and apparent death, autopsies, the taking down of evidence; the appearance of wounds and other external injuries before and after death; effects of suffocation, drowning; the detection of blood stains, seminal fluids, etc.; the evidence of rape, criminal abortion, concealment of pregnancy and infanticide; insanity, feigned diseases; impotence, sterility, legitimacy, life assurance, malpractice, and medical toxicology. The lectures are illustrated with plates and specimens.

9.—SANITARY SCIENCE.—(PROF. W. T. CONNELL.)

Lectures will cover food, water, air and ventilation, sewage disposal, dwellings, hospitals, climate and soil in their relation to the public health. The nature, methods of spread and means of prevention of the infective diseases will also be considered, including isolation, disinfection, quarantine, and disposal of the dead.

10 —ANATOMY —(PROF. RYAN AND DR. MYLKS.)

Anatomy is taught in the most practical manner possible. Five lectures a week are given in the Anatomy class-room, and are fully illustrated by recent dissections on the cadaver, and also by plates, drawings and preparations.

Four of the best dissectors among the third year students are chosen each session as *prosectors*, and these, under the direction of the professor, make careful dissections of the parts to be brought before the class. The students not only hear a description of the tissues of the body, but see them properly dissected and lying in their natural relations to each other. Every facility for studying Anatomy is afforded the students.

11.—PRACTICAL ANATOMY.—(DRS. G. W. MYLKS, A. E. ROSS,
C. A. MORRISON AND A. W. RICHARDSON.)

The dissecting room will be open from 8 a.m. to 6 p.m. for the use of students, and instruction will be given every day in dissecting and in the details of Practical Anatomy by the demonstrators.

12.—MEDICAL AND SURGICAL ANATOMY.—(PROF. MUNDELL.)

Recognizing the importance of the students keeping up anatomical study during their whole course, medical and surgical Anatomy is taught to third and fourth year students. The course is thoroughly practical, the subject, both dissected and undissected, being used to illustrate the lectures.

In the third year attention is especially directed to anatomical relations, to ligation of arteries and to the displacements in fractures and dislocations.

In the fourth year the work of the third year is reviewed, and in addition topographical anatomy of the thorax and abdomen as well as cerebral topography, are thoroughly studied.

13.—PATHOLOGY AND BACTERIOLOGY.—(PROF. W. T. CONNELL
AND DR. WILLIAMSON.)

The course in Pathology comprises :—

1. A series of lectures, two per week, during the session on general pathology and morbid anatomy, for students of the third year. These lectures will be illustrated by plates, diagrams and morbid specimens.

2. A weekly demonstration in morbid histology during the session for third year students. From four to six sections are prepared and demonstrated each week, so that a representative series of specimens of diseased tissues are thus acquired by students.

3. Each student during the third year will be required to spend from three to four weeks in the laboratory in assisting to prepare, stain and mount microscopic specimens of morbid tissues for class use.

4. A series of lectures and demonstrations on Morbid Anatomy for students of the fourth year. Two hours per week will be spent during the session.

5. Students will be taken in rotation to assist in making post mortem examinations and in making reports of such examinations. Students must attend at least six autopsies. Autopsies are held at the mortuaries of the General and Rockwood Hospitals.

6. A class will be held one day each week at which the gross and microscopic morbid specimens from autopsies and operations will be demonstrated.

The course in Bacteriology comprises :—

7. A series of lectures, followed by practical instruction will be held during the first three months of the session.

Each student will have practical instruction in culture methods, examination of pure cultures and examination bacteriologically of secretions and excretions of the body, with strict reference to the bearing of such on practical medicine.

14.—DISEASES OF THE EYE, EAR, NOSE AND THROAT.—(PROF. J. C. CONNELL.)

A course of fifty lectures, didactic and clinical, will be given at the General Hospital. The principles of diagnosis and treatment will be dealt with, and cases illustrating the typical forms of these diseases will be exhibited and explained. There will also be practical lessons in the use of the ophthalmoscope and laryngoscope, the class being divided for this purpose.

15.—ANIMAL BIOLOGY, INCLUDING PHYSIOLOGY AND HISTOLOGY.—(PROF. KNIGHT.)

This includes an elementary course of lectures and demonstrations in Animal Biology and Physiology for first year students, and a course of lectures and demonstrations on Physiology and Histology for second year students.

The electric lantern is used extensively in illustrating topics in Biology, Physiology and Histology.

Students are instructed in the use of various physiological instruments, such as the sphygmograph, spirometer, manometer, etc., and everything is done, as far as time will permit, to make them practically acquainted with modern physiology, its methods, its deductions, and the basis upon which the latter rest.

The minute anatomy of the various tissues and organs will be illustrated by lantern slides, diagrams, and a large number of sections of both fresh and prepared tissues, which will be furnished to each student for examination under the microscope. These sections must be carefully studied, drawn and described in a blank book specially provided for the purpose.

KINGSTON GENERAL HOSPITAL—REAR VIEW.

16.—THEORETICAL CHEMISTRY.—(PROF. GOODWIN, DR. WOOD AND DR. WADDELL.)

This course comprises Chemical Physics, Chemical Philosophy, Inorganic and Organic Chemistry.

The lectures are fully illustrated by experiments.

(a) Junior Chemistry,—Dr. Goodwin and Dr. Waddell.

(b) Senior Chemistry.

1. Organic Chemistry (1st term), Dr. Goodwin.
2. Physiological Chemistry (2nd term), Dr. Wood.
3. Chemistry of the Metals, (Optional.)

17.—PRACTICAL CHEMISTRY.—(DR. WOOD.)

(a) Analytical Chemistry, including the testing of simple solutions and powders by wet and dry methods, and testing for the commoner poisons.

(b) Clinical Chemistry, including urinalysis and the examination of fats, digestive fluids, bile, blood and milk.

N.B.—The examination in Junior Chemistry must be passed before the classes in Practical Chemistry can be attended.

BOOKS RECOMMENDED TO STUDENTS.

THEORY AND PRACTICE OF MEDICINE :— Osler, Anders, Eichhorsts ; for reference, Allbutt's System, Thompson, Twentieth Century.

CLINICAL MEDICINE :—Hare's Practical Diagnosis ; Musser's Medical Diagnosis ; Le Fevre's Physical Diagnosis ; Jackson's Internal Medicine and Clinical Diagnosis.

DERMATOLOGY :—Crocker, Mracek, Grindon.

MATERIA MEDICA, PHARMACY AND THERAPEUTICS :—Bartholow's Materia Medica and Therapeutics ; Hare's Practical Therapeutics ; Mitchell Bruce's Materia Medica and Therapeutics ; Potter's Materia Medica, Pharmacy and Therapeutics.

SURGERY—International Text Book of Surgery ; Stinson's Operative Surgery ; Treves' Operative Surgery ; Treves' System of Surgery ; D. A. Costa's Modern Surgery ; Robert's Modern Surgery ; Whitman's Othopoedic Surgery.

MEDICAL AND SURGICAL ANATOMY—Woolsey's Surgical Anatomy and Operative Surgery ; Treves ; Bellamy ; Fuller's Architecture of the Brain.

OBSTETRICS :—Dorland ; King's Manual ; Hirst ; Carrigue ; American Text-book of Obstetrics.

GYNÆCOLOGY :—Dudley ; Montgomery ; Penrose ; Sutton & Giles.

DISEASES OF CHILDREN :—Dawson Williams ; Smith.

MEDICAL JURISPRUDENCE :—Poore's Medical Jurisprudence ; Reese's Medical Jurisprudence ; Herold's Legal Medicine ; Taylor's Medical Jurisprudence (11th Am. edition). For reference : Hamilton, Tidy, or Witthaus & Becker.

SANITARY SCIENCE :—Wilson's Hand-book ; Notter & Firth's Theory and Practice of Hygiene ; Rohe's Text-book of Hygiene ; Harrington's Practical Hygiene ; Abbott's Hygiene of Transmissible Diseases ; Pyle's Personal Hygiene ; Bergey's Hygiene.

ANATOMY :—Gray, \$6.50 ; Heath, \$4.50 ; Quain, \$10.80 ; Holden.

PRACTICAL ANATOMY :—Cunningham, Heath, \$4.50 ; or Ellis.

PATHOLOGY :—Stengel, a Text-book of Pathology, \$5.00 ; Green, Pathology and Morbid Anatomy ; Coates Pathology ; Zeigler's Pathology ; Coplin's Pathology, the American Text-book of Pathology.

PRACTICAL PATHOLOGY AND TECHNIQUE :—Connell's Practical Bacteriology ; Mallory & Wright's Pathological Technique ; Gaylord & Aschoff's Pathological Histology ; Duerck's Pathologic Histology.

BACTERIOLOGY :—Park's Bacteriology in Medicine and Surgery ; McFarland's Pathogenic Bacteria (3rd edition, \$3.25), Abbott's Handbook of Bacteriology ; Sternberg's Bacteriology.

DISEASES OF THE EYE, EAR, NOSE AND THROAT :—Connell, J. C. ; Nettleship ; Fuch's ; Bacon ; The American Text Book.

INSTITUTES OF MEDICINE :—Kirke's Handbook of Physiology, last edition (17th) ; American Text-Book of Physiology.

ELEMENTARY ANIMAL BIOLOGY :—Beddard's, Ramsay Wright's or J. S. Kingsley's Zoology.

ELEMENTARY PHYSIOLOGY :—Moore's Elementary Physiology (Longmann's Green & Co.)

HISTOLOGY :—Sterling, or Dunham. Strongly recommended ; Boehm, translated and edited by Davidoff and Huber.

CHEMISTRY :—Shenstone's Inorganic Chemistry ; Waddell's Arithmetic of Chemistry, Bernthsen's Organic Chemistry, Simon's Manual of Chemistry ; Holland's The Urine, etc. ; Purdy's Practical Urinalysis and Urinary Diagnosis (4th edition.)

MUSEUM.

The Museum contains numerous valuable Pathological Specimens collected both from hospital and private practice.

Contributions of morbid specimens will be gladly received from practitioners and duly acknowledged in the next Calendar.

RECEIVED DURING 1902-'03.

Endothelioma Skin of the Back }
Multiple Myomas of Uterus. } Dr. Ilett, Watertown.

Epithelioma of Oesophagus, Dr. Amys, Peterboro.

Large Gall Stone, Dr. Symington, Napanee.

Calcareous Nodules expectorated by a phthisical subject.
Dr. Mather, Tweed.

In addition to these, numerous specimens have been received from the staffs of the General Hospital, Rockwood Hospital for the Insane and Hotel Dieu Hospital.

LIBRARY.

The Library of the medical Department, to which students have access, is furnished with the standard text-books and works of reference. The reading room is always provided with the leading medical and surgical publications and periodicals of the day.

College of Physicians and Surgeons of Ontario.

SECTION I.

MATRICULATION.

Everyone desirous of being registered as a matriculated student in the Register of this College, except as hereinafter provided, shall be required to pay a fee of twenty dollars and to conform to the following regulations :

1. Any person who presents to the Registrar of the Medical Council a certificate that he has passed the examination conducted by the Education Department on the course prescribed for matriculation in Arts, including chemistry and physics, and approved by the Lieutenant-Governor-in-Council, shall be entitled, on payment of the lawful fees in that behalf, to registration as a medical student within the meaning of Section XIX. of the Ontario Medical Act.

2. A certificate from the Registrar of any chartered university conducting a full Arts course in Canada, that the holder thereof has passed the senior matriculation of such university or the examination conducted at the end of the first year in Arts by such university, shall entitle such holder to registration as a matriculate.

3. Graduates in Arts, in any university in His Majesty's dominions, are not required to pass this examination, but may register their names with the Registrar of the College upon giving satisfactory evidence of their identity, the presentation of a certificate of qualifications, and the payment of the fee of twenty dollars.

4. Every medical student after matriculation shall be registered in the manner prescribed by the Council, and this shall be held to be preliminary to his medical studies, which will not be considered to begin until after the date of such registration.

SECTION II.

MEDICAL CURRICULUM.

1. Every student must spend a period of five years in actual professional studies, except as hereinafter provided; and the prescribed period of studies shall include four winter sessions of eight months each. The fifth, or final year, shall be devoted to clinical work, six months of which may be spent with a registered practitioner in Ontario, or with an approved practitioner outside of Ontario, and six months must be spent at one or more public hospitals, dispensaries or laboratories devoted to physiological or pathological research, Canadian, British or foreign, approved by the Council, and must attend at least one hundred clinical lectures or demonstrations as follows: twenty-five on medical cases, twenty-five on surgical cases, twenty-five on obstetrical and gynaecological cases, and twenty-five on pathology, certificates for which must be presented to the Registrar of the Council, signed by teachers of schools or colleges recognized by the council, together with a certificate of six months hospital attendance during the fifth year. A certificate of having been house surgeon in a recognized hospital for one year will be accepted in lieu of these clinical lectures and hospital attendance.

2. Graduates in Arts or Science of any college or university recognized by the Council who shall have spent two years in the course of physics, chemistry, biology and physiology, who have graduated in Arts as above specified prior D. beginning their Medical course, and shall have passed examinations in their university course in the said subjects while taking their degrees, will be required to spend four years in the study of medicine, and on condition that prior to the third year they shall have passed the Primary examination, they shall be permitted to take both the Intermediate and Final examinations on completion of the fourth year, but shall have no remission in the number of clinical lectures.

No tickets for lectures will henceforward be accepted by the Council unless it is endorsed thereon as shown by teachers' roll, that the pupil has at least attended seventy-five per cent. of the set number of lectures of each course—and it is enacted that said certificate shall specifically state that such attendance extended over a period of at least eight months.

3. Applications for every professional examination must be made to the Registrar of the College of Physicians and Surgeons of Ontario two weeks prior to the examinations. No application will be received unless it is accompanied by the necessary tickets and certificates, and by the Treasurer's receipt showing that the fees have been paid.

4. Excepting as hereinafter specified, each eight months' course shall consist of not less than eighty lectures, and each "four months' course" of not less than forty lectures.

5. Every student must attend the undermentioned courses of lectures in a university, college or school of medicine approved of by the Council, viz.:

ANATOMY.—Two courses of eight months each in descriptive and practical Anatomy, consisting of not less than 280 lectures or demonstrations of an hour each in each year.

TOPOGRAPHICAL ANATOMY (Medical, Surgical).—One course of not less than 50 lectures.

PHYSIOLOGY.—There shall be two courses of eight months each in Physiology and Histology, consisting of not less than 120 lectures and demonstrations of an hour each in each year.

CHEMISTRY.—There shall be two courses of eight months each in Chemistry, theoretical and practical, consisting of not less than 150 lectures or demonstrations of an hour each in each year.

MATERIA MEDICA AND PHARMACY.—Two courses of not less than 50 lectures each.

PRINCIPLES AND PRACTICE (Medicine).—Two courses of not less than 80 lectures each.

SURGERY (principles and practice).—Two courses of not less than 80 lectures each.

MIDWIFERY AND DISEASES OF WOMEN.—Two courses of not less than 80 lectures each.

CLINICAL MEDICINE.—Two courses of not less than 100 lectures each.

CLINICAL SURGERY.—Two courses of not less than 100 lectures each.

MEDICAL JURISPRUDENCE AND TOXICOLOGY.—One course of not less than 50 lectures.

PATHOLOGY (including Bacteriology).—One course of 100 lectures or demonstrations.

SANITARY SCIENCE.—One course of 30 lectures.

THERAPEUTICS.—One course of 50 lectures.

MENTAL DISEASES.—One course of 10 lectures.

DISEASES OF CHILDREN.—Two courses of 20 lectures.

NOTE.—Each lecture or demonstration shall consist of not less than one hour's duration.

A certificate of having attended five lectures, and five demonstrations upon the use of Anæsthetics and certificates of having personally administered Anæsthetics five times under supervision of a legally qualified practitioner.

6. Every candidate will be required to prove that he has carefully dissected the entire adult human body.

7. Also must have attended the practice of a general hospital for twenty-four months during the first four years of study.

8. Also must have attended six cases of midwifery.

9. Also must, before being registered as a member of the College of Physicians and Surgeons of Ontario, have passed all the examinations herein prescribed, and attained the full age of twenty-one years.

HOTEL DIEU HOSPITAL.

SECTION III.

EXAMINATION.

1. The professional examinations are divided into three parts: "Primary," "Intermediate" and "Final."

2. The Primary examinations shall be undergone after the second winter session, and the Intermediate after the fourth winter session, the Final after the fifth year.

3. The following branches shall be embraced in the Primary examination :

(a) ANATOMY.

(b) PHYSIOLOGY AND HISTOLOGY.

(c) CHEMISTRY (Theoretical and Practical.)

(d) MATERIA MEDICA AND PHARMACY.

4 Every candidate for the Primary examination will be required to present, with his lecture tickets, a certificate of having undergone and passed an examination at the school he has attended at the close of his first winter session on Primary branches. Also a certificate of ability to make and mount microscopic specimens.

5. Each candidate for final examinations must present a certificate of attendance at six post-mortem examinations, a certificate of ability to draw up a report of a post-mortem examination ; a certificate of having reported satisfactorily six cases of clinical medicine, and six cases of clinical surgery, and a certificate of having passed his Intermediate examination, the certificates to be signed by the teachers referred to upon these subjects, or the practitioner holding post-mortem.

6. All candidates shall (excepting Art graduates) present a certificate of having passed at the close of their third session in the college or school they may have attended. an examination in such parts of medicine, surgery and midwifery as may be thought advisable by the faculties of the respective colleges or schools. This examination is not in any way to interfere with any of the examinations of the Council. One year's attend-

ance after the Intermediate examination as House Surgeon or Physician in any Hospital recognized by the Council shall be held to be equivalent to the fulfilling of the requirements for the fifth year of clinical work.

The following branches shall be embraced in the intermediate examination :

- (a) MEDICAL, SURGICAL AND TOPOGRAPHICAL ANATOMY.
- (b) PRINCIPLES AND PRACTICE OF MEDICINE.
- (c) GENERAL PATHOLOGY AND BACTERIOLOGY.
- (d) SURGERY, OTHER THAN OPERATIVE.
- (e) SURGERY, OPERATIVES.
- (f) MIDWIFERY, OTHER THAN OPERATIVE.
- (g) MIDWIFERY, OPERATIVE.
- (h) MEDICAL JURISPRUDENCE, INCLUDING TOXICOLOGY AND MENTAL DISEASES.
- (i) SANITARY SCIENCE.
- (j) DISEASES OF CHILDREN.
- (k) DISEASES OF WOMEN.
- (l) THERAPEUTICS.

7. The Primary and intermediate examinations shall be "written" and "oral." The Final "oral" and "clinical."

8. The following branches are embraced in the Final examination :

- (a) CLINICAL MEDICINE.
- (b) CLINICAL SURGERY.
- (c) DISEASES OF WOMEN.
- (d) DISEASES OF CHILDREN, MEDICAL AND SURGICAL,

9. Candidates for the Primary who fail in all subjects but two must make 60 per cent. in each of these subjects, or get no credit for any. Candidates for Intermediate who fail in all subjects save three, will be allowed those three if they pass 60 per cent. in each.

10. A professional examination will be held in Toronto on the third Tuesday in November, 1903. All candidates who have failed in a former examination will be required to pay a fee of twenty dollars for this examination. The next professional examination thereafter will be held at Toronto and Kingston on the third Tuesday in May, 1904.

SECTION IV.

FEEES.

1. The following scale of fees has been established by the Council of the College of Physicians and Surgeons of Ontario :

(a) Registration of Matriculation.....	\$20 00
(b) Primary examination.....	30 00
(d) Intermediate and Final examination, including registration.	50 00

2. All fees must be paid in lawful money of Canada to the Treasurer of the College.

3. No candidate will be admitted to any examination until the fee for such examination is paid in full.

4. Candidates who have failed in any professional examination in more than one subject shall pay a fee of twenty dollars for each subsequent examination, if only one subject ten dollars.

EXAMINATION PAPERS.

PHYSICS.—(SUPPLEMENTAL).

Examiner : W. C. Baker, M.A.

1. Two men carry a weight of 100 lbs. suspended from a pole 15 feet long ; each man is 18 inches from his end of the pole. Where must the weight be attached in order that one man may bear $\frac{3}{4}$ of it?

2. A tube of glass, open at both ends, is placed vertically with its lower end in a reservoir of mercury. The upper end is then attached to an air pump. Explain what happens as the air is exhausted from the tube. When all the air has been removed from the tube what is the difference in the levels of the mercury in the tube and in the reservoir?

3. Explain why a soap bubble is spherical.

4. "The specific heat of mercury is 0.033." Explain fully the meaning of this statement.

5. You have no difficulty in distinguishing the voices of your intimate friends. Explain why and how one voice differs from another.

6. If one looks vertically down into a pond of clear water 4 feet deep, it appears as if the bottom were but 3 feet below the surface. Explain fully.

7. Show by a diagram the *apparent* position and size of an object viewed through a simple convex lens.

8. What are the following : *Volt, ohm, ampere, coulomb*?

9. Describe a thermopile.

JUNIOR ANATOMY.

Examiner : Dr. Ryan.

1. Name the bones entering into the formation of the orbital cavity.

3. What muscles are attached to the occipital bone?

3. Describe the elbow joint and name the ligaments in connection therewith.
4. Describe the upper third of the femur.
5. What muscles are attached to the fibula?
6. Name the ligaments in connection with the knee joint.

ANIMAL BIOLOGY.

Examiner: Dr. Knight.

1. Sketch the natural history of the aphides.
2. Discuss the origin and necessity of fluid tissues.
3. Illustrate the law of recapitulation by reference to crustaceans. Describe a calcareous sponge.

Physiology.

1. Describe the inner surface of one ventricle in a cat's heart.
2. What is the source of carbon dioxide in expired air? Explain how it is carried to the lungs and passed into the outer air.
3. What changes take place in the clotting of blood?
4. In what different ways is heat lost from the body?
5. Classify digestive glands and give examples of each kind. What is the action of *invertin*?
6. Classify neurones. How do we know that the anterior and posterior roots of spinal nerves differ fundamentally in function?
7. Define a nerve centre. Specify the influences which affect the respiratory centre.

JUNIOR CHEMISTRY.

Examiner: Dr. Goodwin.

1. Give equations representing any method of production of carbon monoxide, chlorine, nitrogen, caustic potash. Write in words the reaction that takes place in each case, and state any conditions such as temperature that are necessary.

2. (a) Write structural formulae for acetic acid and for formic acid in such a way as to show the relations of these compounds. (b) How is acetic acid made?

3. Three compounds of a certain element and oxygen have the following percentage composition :

The element. . . . 63.63 ; 46.66 ; 25.92.

Oxygen. 36.37 ; 53.34 ; 74.08.

Show that the law of multiple proportions holds with them.

4. The gas density of phosphorus is 4.3 (air = 1). Its atomic weight is 31. Calculate the molecular weight and write the molecular formula.

5. Sulphuretted hydrogen is passed through solutions of lead acetate, arsenic trichloride, ferrous sulphate, calcium chloride, and sodium nitrate. In which solutions would a change be noticed? What would be the character of the change? Give equations representing the reaction.

6. How is phosphine (phosphoretted hydrogen) made? What is the character of the gas? Compare it with ammonia.

7. What weights of quick lime and of ammonium chloride must be used in order to produce five liters of ammonia measured at 750 mm. and 20° C.?

8. (a) Define a *tribasic acid*, (1) theoretically, (2) practically. (b) Give examples of two *tribasic acids*, and write the formulae of all their *sodium salts*.

JUNIOR MATERIA MEDICA.

Examiner : Dr. Campbell.

1. Distinguish between emollient and demulcent, vesicant and rubefacient, irritant and counter-irritant.

2. What do you mean by adult dose, maximum and minimum dose? How find a dose for a child 2 years old? What circumstances modify the dose? What is meant by divided dose? Give an example.

3. Define alkaloid, mentioning the principal characteristics.

4. Give in detail the steps in preparing tincture of gentian. Give therapeutical influence of gentian.
 5. Discuss the use of alcohol (*a*) in relation to its action on the stomach, (*b*) in relation to its action on metabolism.
 6. Mention briefly the precautions to be taken and the danger symptoms in chloroform anaesthesia.
-

SENIOR ANATOMY.

Examiner : Dr. Ryan.

1. Describe the great wing of the sphenoid bone.
 2. Name from before backwards the structures exposed to view on the inferior surface of the cerebrum.
 3. Trace the course and give the distribution of the hypoglossal nerve.
 4. Describe the spleen and give its relations.
 5. Demonstrate the pelvic fascia.
 6. Trace the course and give the distribution of (*a*) internal pudic artery, (*b*) obturator nerve.
 7. Give origin, insertion, and nerve supply of scalenus anticus, pronator radii teres, psoas magnus, levator ani, and peroneus longus.
 8. Describe the prostate gland and give its relations.
-

SENIOR PHYSIOLOGY.

Examiner: Dr. Knight.

1. Give the chemical composition of nerve tissue.
2. Specify the various causes which influence the vaso-motor centre. Discuss the existence of heat centres.
3. Indicate the muscular and nervous mechanism for keeping the surface of the eyeball clean, and for regulating the amount of light entering the eye.
4. Mention different points at which defects in hearing may occur. Specify the defects.

5. How do nerve cells in various parts of the nervous system differ from each other in (a) shape, (b) function, and (c) their peripheral endings?

6. Outline the muscular and nervous mechanism in writing from dictation.

7. Sketch the evidence for our belief in the separation of afferent and efferent axones in the spinal cord.

SENIOR HISTOLOGY.

Examiner: Dr. Knight.

1. Describe the following varieties of connective tissue: (a) areolar, (b) adipose, (c) lymphoid.

2. Give in detail the histology of a vertical front-to-back section of the posterior half of the eye.

3. Describe a liver lobule.

4. Draw, describe, and identify the specimens submitted.

SENIOR CHEMISTRY.

Examiner: Dr. Goodwin.

1. A hydrocarbon is formed to contain 7.69% of hydrogen. Its vapour has a density 2.71 times that of air. What is the formula of the hydrocarbon?

2. What is "sulphuric ether"? How is it manufactured? What are its properties and chemical relationships?

3. (a) What are hydrazines? (b) How are they made?

4. Describe the preparation and properties of oxalic acid, or tartaric acid, or citric acid; and mention any important medicinal compounds.

5. Compare the preparation and reactions of the cyanides and isocyanides.

6. Describe the preparation and properties of either phenol or benzoic acid, and show the connection with benzene.

FENWICK OPERATING THEATRE.

7. (a) How is antifebrine (acetanilide) made? (b) Make clear its chemical relations to ammonia, to aniline, and to acetic acid.

8. (a) Write a formula for phenol-sulphonic acid so as to show its relationship to sulphuric acid. (b) How can the mercaptans be converted into sulphonic acids? Write an illustrative equation.

SENIOR MATERIA MEDICA, PHARMACY AND THERAPEUTICS.

Examiner: Dr. Campbell.

1. Discuss the use of aconite, phenacetine, quinine and baths in the reduction of *fever*.

2. What conditions would lead you to prescribe nitroglycerine, digitalis and alcohol, separately or collectively?

3. How would you prepare cocaine muriate? What are the indications and contra indications for its use? How would you prepare a 2% solution, and how much of a 2% solution could be used with safety?

4. A patient complains of soreness and burning pain over the gastric region worst 1½ to 2 hours after eating, eructation of sour gases, appetite good, constipation and headache. Write a prescription for his trouble.

5. Classify agents acting upon the kidneys, giving examples.

6. Criticize :

Sodium salicylate.....	oz. i.
Quinine sulphate.....	dr. ½.
Sweet spirits of nitre.....	oz. ½.
Polassium acetate	dr. i.
Water	to oz. iv,

Sig. drs. ii every 4 hours.

JUNIOR PRACTICE OF MEDICINE.

Examiner : Dr. Third.

1. Write short notes on : Crepitant râle, broken compensation, tachycardia, Corrigan pulse, toxic angina.
2. Give the etiology, symptoms, and treatment of atheroma.
3. Describe the symptoms and physical signs of acute serofibrinous pleurisy.
4. Write a short description of Addison's disease.
5. Diagnose mitral regurgitation and trace the mechanical effects of this condition on the viscera generally.

JUNIOR SURGERY.

Examiner : Hon. Dr. Sullivan.

1. Describe in order the symptoms of Sapræmia and results.
2. Detail the successive changes observed by the microscope in the blood vessels and their contents when an irritant is applied.
3. A young man dies from shock of a severe injury. Give the post-mortem appearance due to it.
4. In chronic abscess when would you open it? What would be the results very likely to follow?
5. Name the varieties of Sarcoma. Select one; give its usual site, course likely to follow, and how you would treat it.
6. Name the microscopic appearances and relations to each other of a tuberculous nodule beginning to soften.
7. A young man receives a bullet wound from a revolver between the seventh and eighth ribs, right side, midway between mesial line and a line from midaxillary space to the same level. How would you treat it, and why?

JUNIOR OBSTETRICS PEDIATRICS.

Examiner : Dr. Wood.

1. Discuss the functions of (a) the amniotic fluid (b) the placenta.

2. What are the positive signs of pregnancy? Discuss their relative value in diagnosis.

3. What are the most common causes of delayed labour, and what are the dangers (*a*) to the mother (*b*) to the child?

4. Write instructions for the care of (*a*) the mother, (*b*) the child during the first three days after labour.

5. State the incubation period for (*a*) measles, (*b*) scarlet fever. Give the differential diagnosis.

6. Discuss (*a*) the clinical course, (*b*) the preventive treatment of rheumatic endocarditis.

JUNIOR MEDICAL AND SURGICAL ANATOMY.

Examiner: Dr. Mnndell.

1. Movements permitted at sternoclavicular articulation. Between what structures do they occur? Give briefly the attachment and action of the muscles producing these movements.

2. Landmarks for circumflex nerve, musculospiral nerve, lower border of pectoralis minor, radial artery, median nerve in forearm, saphenous opening, spine of ischium, gluteal artery.

3. Differentiate between the serous swellings that may occur in the region of the elbow joint.

4. Name the chief ligaments of hip joint. Position assumed by the leg in (1) synovitis (with effusion) of the hip joint, (2) first and second stages of morbus coxae.

5. Explain production of transverse fracture of patella. Why is the union that results so frequently fibrous?

6. Bony landmarks in inner side of foot, and illustrate by a diagram the longitudinal arch of the foot.

MEDICAL JURISPRUDENCE.

Examiner: Dr. W. T. Connell.

(N.B.—Answer five questions only.)

1. Describe the changes which occur in the muscles after death. Distinguish between the rigidity of catalepsy or trance and that of rigor mortis.

2. A body is recovered from the water evidently dead about 24 hours. What proofs would suffice to convince you that the individual had been drowned? How would you proceed to attempt to resuscitate a person apparently drowned.

3. Poisoning by carbolic acid. Describe the usual signs and symptoms and your treatment in such a case. In a fatal case, describe the post-mortem appearances, the fatal dose, and fatal period.

4. Poisoning by laudanum. Describe the symptoms in a case progressing to a fatal issue. How would you treat a case of this form of poisoning? What is the fatal dose and period, and what organs would you preserve for analysis?

5. A recent stain is believed to be a blood stain. How would you demonstrate (*a*) that the stain was blood, (*b*) that the stain was human blood?

6. Poisoning by phosphorus. What are the usual sources of this poison? Describe the symptoms after a medium sized poisonous dose, together with the fatal dose and fatal period. How would you treat a case of this poisoning? For what disease might phosphorus poison be taken?

PATHOLOGY.—THIRD YEAR.

Examiner: Dr. W. T. Connell.

N.B.—(Answer five questions only.)

1. Define gangrene. Describe its common causes, its main forms, and the method of separation of the gangrenous part where the extension process has ceased.

2. Describe in some detail the possible lesions of the tubercle bacillus in tissues.

3. Distinguish between fatty infiltration and fatty degeneration. Illustrate your answer by describing these conditions as they affect the heart muscle.

4. (a) What are the characteristics which distinguish benign (innocent) from malignant tumors?

(b) Distinguish between sarcomas and carcinomas.

(c) Classify carcinomas, giving main seats of each variety.

5. An amputation stump fails to unite by first intention, the sutures giving away. Describe the healing process after such an event.

6. Chronic or sclerotic endocarditis. Describe the origin of this condition, its usual lesions and their effects on the working of the heart.

SANITARY SCIENCE.

Examiner: Dr. W. T. Connell.

1. Describe shortly the ways in which meat may be rendered unfit for human food.

2. What methods of water purification are in use (a) on domestic, (b) on larger scales? Discuss their uses and value.

3. Discuss the methods of spread and means of prevention of (a) typhoid fever, (b) small pox, (c) diphtheria.

4. What is the general composition of sewer air? Air from a partially choked sewer is escaping into an ordinary school-room. Discuss the probable effects on the health of the school children.

5. (a) Discuss the value and uses of (1) bichloride of mercury, (2) formaldehyde, (3) sulphur gas, (4) permanganate of potash as disinfectants.

(b) Disinfect (1) a room and contents after scarlet fever, (2) sputum, (3) typhoid urine.

6. Describe the life history of (a) *Triclona spiralis*, (b) *Cysticercus cellulosus*, (c) *Oxyuris vermicularis*.

SENIOR PRACTICE OF MEDICINE.

Examiner : Dr. Third.

1. Briefly outline your management of a case of typhoid fever.

2. Write a short account of the chemistry of gall-stones. What symptoms indicate the arrest of a gall-stone in (a) the cystic duct, (b) the common duct, (c) the intestine?

3. Describe an epileptic paroxysm. How does it differ from (a) an hysterical, (b) a uraemic convulsion? Discuss the value of outdoor life and occupation in the treatment of epilepsy.

4. Give the diagnosis and treatment of psoriasis.

5. S. B., aet. 24. Parents living. No brothers or sisters. Jan. 4—After several hours' exposure had a severe chill, with sharp pains on the right side. Jan. 9—Rusty sputum, dyspnoea, and all the physical signs of pneumonic consolidation. Jan. 15—Still no "crisis." Expectoration greenish in color. Temp.—A.M., 102 ; P.M., 104.6. Discuss the diagnosis.

6. What symptoms result from a destructive lesion of (a) the knee and anterior two-thirds of the posterior limb of the internal capsule, (b) the lower portion of the pons, (c) the ventral horns of the cord.

SENIOR SURGERY.

Examiner : Hon. Dr. Sullivan.

1. Name two dislocations below the shoulder joint, the most common ones, and give special features of each. Select one, and indicate the mode of reduction you would employ.

2. Contrast in parallel lines the features of cancer and sarcoma. Not less than four (such as site, structure, etc.).

3. State when and why Colostomy should be performed. Name the place (generally) you would select the vessels or nerves divided.

4. Divide the process of repair in simple fracture in a young adult into three stages. Illustrate the state of the new bone at the end of each by the treatment of Pott's fracture, showing what is needed to secure a healthy, natural union.

5. Give the causes, mode of examination, and treatment of fistula in ano.

6. Diagnose a syphilitic node on usual site.

7. A married woman, aged 44, has a tumor in the right breast which she noticed six months previously, then the size of a large pea. Name in order the method you would employ to ascertain the class to which the tumor belongs.

SENIOR OBSTETRICS AND GYNAECOLOGY.

Examiner : Dr. Garrett.

1. Name only the causes of abortion. How would you manage a case of inevitable abortion?

2. Give the causes and symptoms of fetal death *in utero*.

3. Describe the mechanism of a breech presentation, left sacro-anterior. Describe briefly the methods that may be used for the rapid extraction of the after-coming head. Describe the delivery of the head in such a case by the forceps operation.

4. Give the symptoms and treatment of puerperal venous thrombosis (phlegmasia alba dolens).

5. Give the causes and symptoms of vesico-vaginal fistula.

6. What do you understand by the operation known as trachelorrhaphy? In a given case what symptoms would lead you to decide that such an operation was necessary?

7. Give the symptoms and clinical appearance of a case of chronic endocervicitis. How may it be diagnosed from early cancer of the *cervix uteri*?

8. A tumor the size of a large fist is discovered in the region of Douglas' cul-de-sac. Discuss the probability of its being (a) a fibroid tumor of the uterus, (b) subinvolution of the uterus, (c) a retroverted gravid uterus, (d) a pelvic hematocele.

SENIOR MEDICAL AND SURGICAL ANATOMY.

Examiner: Dr. Mundell.

1. Diagnose (a) fracture of humerus above condyles. (b) popliteal aneurism.
2. A patient has ptosis and external strabismus (right side) with paralysis of opposite half of body. Where would the lesion likely be situated?
3. Tell how you would mark out on the skull (1) the inferior frontal fissure, (2) the intraparietal fissure, (3) the point for trephining mastoid antrum, (4) the point for trephining the sigmoid sinus, (5) the point for trephining a cerebellar abscess.
4. Outline (in writing) the boundaries of the lower lobe of right lung.
5. (a) Explain how a disordered stomach may cause disturbed action of the heart.
(b) What structures correspond to the fourth dorsal vertebra?
6. Landmark for (1) pylorus, (2) lower border of stomach, (3) upper border of liver, (4) appendix.

PATHOLOGY—FOURTH YEAR.

Examiner: Dr. W. T. Connell.

(N.B.—Answer five questions only.)

1. Pleurisy with effusion (serous). Describe its causes, gross appearances, the character of the fluid, the course of lesions leading to its formation, and its possible terminations.
2. Mention the causes and forms and describe the lesions of acute dysentery as met with in Canada.
3. Portal cirrhosis (lobular). Describe its causes, the gross appearances met with and the usual microscopic features. What other conditions are usually met with in well-marked cases?
4. Chronic parenchymatous nephritis. Mention the usual forms of kidney met with post-mortem in this condition. Describe the gross and microscopic features of the common form. What is the cause of the albuminuria met with?

PHYSIOLOGICAL MUSEUM.

5. Hypertrophy or enlargement of prostate. Describe its usual nature, portions affected, and its effects on urethra and bladder.

6. What is locomotor ataxia (tabes dorsalis)? What are its causes? Describe the gross and microscopic features of affected parts of cord.

DISEASES OF THE EYE, EAR, NOSE, AND THROAT.

Examiner: Dr. J. C. Connell.

1. What are the contagious diseases of the eye? State the cause of each, and give the treatment of any one in detail.

2. Describe the operation of enucleation. What are the indications for the operation?

3. Describe the various methods of inflation of the tympanum.

4. What are the causes of nasal stenosis?

5. What are the symptoms, differential diagnosis, and treatment of laryngeal tuberculosis?

BACTERIOLOGY.

Examiner: Dr. W. T. Connell.

1. A guinea-pig is inoculated with sputum and dies within two days. What bacteria may be the cause, and how would you proceed to demonstrate which was active?

2. How would you proceed to demonstrate the presence of the typhoid bacillus in (a) a case of typhoid fever, (b) a fatal case of fever? What tests would satisfy you that you had succeeded in separating out this bacterium?

3. How is diphtheria antitoxin prepared? Describe the theory of its formation in the body and its method of antagonizing the toxin.

4. How would you proceed to make a bacteriological diagnosis in case of suspected diphtheria? How would you definitely prove that you had obtained the diphtheria bacillus in such a case?

5. Describe the morphological, staining and cultural character of the micrococcus gonorrhoea (gonococcus), and also its pathogenic action.

6. Describe (*a*) fractional sterilization, (*b*) spores and their import, (*c*) methods of bacterial multiplication, (*d*) meaning of "specific bacterium."

STUDENTS IN MEDICINE.

SESSION 1902-1903.

NAME.	ADDRESS.	YEAR.

PRIZES.

Dr Hayunga's Prize for the best dissection :

H. A. Boyce.....	Murray
Faculty Prize of \$25.00 for best examination on Anatomy, Physiology and Chemistry :	

Equal.

A. C. Spooner.....	Latimer
H. A. Boyce.....	Murray
Dr. Hayunga's Prize for best examination on Materia, Therapeutics and Pharmacy :	

A. C. Spooner.....	Latimer
Dean Fowler Scholarship :	

W. Gibson.....	Emerald
Dr. Clarke's Prize for best examination on Mental Diseases :	

W. Workman.....	Kingston
Chancellor's Scholarship :	

G. H. Ward.....	Napanee
Dr. Mundell's Prize for best examination on Medical and Surgical Anatomy :	

G. H. Ward.....	Napanee
Dr. McCabe's Prize for best examination on third year Pathology :	

A. H. Singleton.....	Newboro
Medal in Medicine :	

W. S. Murphy.....	Portland
Medal in Surgery :	

A. H. Leonard.....	Kingston
Recommended for House Surgeoncies at the Kingston General Hospital :	

W. S. Murphy.....	Portland

THE DEAN FOWLER SCHOLARSHIP.

With the session 1900-1901 Dr Fife Fowler completed his 47th year as a teacher on the Medical Faculty of Queen's University. To commemorate his services to the University it was decided by the Medical Faculty and medical graduates of Queen's to found a scholarship to be known as the Dean Fowler Scholarship. The minimum sum aimed at was \$1,000, and the maximum \$3,000. A subscription list was opened. So far \$863.00 have been received and acknowledged in the previous Calendars.

The subscription list is still open. Contributions will be received by Dr. Herald, Secretary of the Medical Faculty, and acknowledged in the next issue of the Calendar.
